Education

Brooklyn Technical High School — Brooklyn, NY
Major in Research — *Aug. 2022 – June. 2026*

University of Colorado Boulder — Boulder, CO
Bachelor's in Mathematics — *Aug. 2026 – May 2030*

Experience

Research Intern — April 2025 – Present
Vice Ventures — *New York, NY*

- Assisted in data collection and analysis to support project objectives.
- Conducted research on industry trends to inform decision making processes.
- Developed reports summarizing findings for team review and presentations.

AI Strategy Intern — Feb. 2026 – Present
Devexana — *New York, NY*

- Advised on the development of Devexana, an AI operations platform designed to provide AI solutions and technology consulting to small municipalities in the greater New York area.
- Managed communications with OpenAI regarding enterprise API deployment, data privacy, and Zero Data Retention (ZDR) requirements for government clients.
- Researched data-processing agreements, U.S. data residency, and FedRAMP considerations to assess viability for municipal deployments.

Lifeguard — May. 2025 – Sept 2025
NYC Department of Parks and Recreation — *New York, NY*

- Worked full time during the summer at 50+ hours a week.
- Monitored swimmer safety across designated zones.
- Performed first aid as needed and executed water rescues.

Projects

Tutoring Business and Mathwins Nonprofit | *Leadership, Communication, Operations* — Aug 2024 – May 2026

- Built and managed a tutoring operation serving students in mathematics and other academic subjects, scaling to multiple tutors and generating over 10,000 in profit.
- Revived and expanded MathWins, a nonprofit tutoring initiative providing academic support and test prep.
- Trained and mentored new tutors, promoting best practices in instructional techniques.
- Managed parental relations and contact.

Bitcoin Price Modeling Program | *Google Antigravity, Data Analysis, Statistical Modeling* — March 2026 – Present

- Applied statistical concepts learned in coursework to develop a Monte Carlo simulation modeling potential future Bitcoin price movements using historical market data
- Developed an AI-assisted risk analysis framework comparing model-derived probabilities with market-implied probabilities on Kalshi to calculate expected value across available positions.
- Built a ranking system to identify prediction-market positions with the most favorable expected value under market scenarios.

Leadership & Activities

Brooklyn Tech Ultimate Frisbee: Team Captain; led team to NY State Championship and first-ever national qualification for an NY team with a national ranking of 8
